Welcome

You would like to enhance your basic knowledge of business management with specialist knowledge in international accounting, international controlling and taxation?
You are looking for a degree programme that is scientifically sound and at the same time highly application-oriented?

The International Accounting, Controlling and Taxation Master's programme at ESB Business School focuses on international business segments in all subjects. All-day workshops in companies, an extensive business game as well as corporate projects complete the study programme. After gaining your Master's degree you will be ideally prepared for a management career in the area of controlling and finance in international consulting companies. You will also be qualified to start a career as an auditor or tax advisor. Further, you can apply for a doctoral programme after gaining your Master's degree.

Teaching by experts with practical experience

An experienced team of professors guarantees a first-class transfer of knowledge. In addition to the lectures, each semester includes company-related project work, case studies and workshops in companies. Together with professional competence, international and social skills are also enhanced.

In addition to the ESB team of professors you will also be taught by company representatives from accounting and auditing companies. They provide in-depth insights into operative and auditing practice as well as practice-relevant and up-to-date teaching content. This degree programme was designed in cooperation with "RWT Reutlinger Wirtschaftstreuhand GmbH" and other successful local tax consulting and auditing companies. With their up-to-date expert knowledge they support the degree programme by offering practical courses.

Partner universities

- Napier University, Edinburgh, UK
